

Loading The Dataset

- Before you can build a view and analyse your data, you must first connect the data to IBM Cognos. Cognos supports connecting to a wide variety of data, stored in a variety of places.
- The data might be stored on your computer in a spreadsheet or a text file, or in a big data, relational, or cube (multidimensional) database on a server in your enterprise.
- In our case, we will be using a spreadsheet or text file for making our analysis.

 Search content

 1

Quick launch

Upload data

Upload or drag and drop spreadsheets, csv files, and other data sources.

Prepare data

Use data modules to clean and connect data from multiple resources.

Exploration

Quickly find unbiased answers by identifying trends in your data with data exploration.

Present

Create sophisticated multi-query or stories.

Get startedRecent

Get up and running in IBM Cognos Analytics

How-to videos

Learn how to use IBM Cognos Analytics and start gaining insights into your data.

[Watch videos](#)

Accelerator Catalog

Browse a growing catalog of industry use, best practice guides, custom visualizations, and more.

[Browse catalog](#)

Learning resources

Expand your knowledge and get assistance by connecting with the community, reading documentation, and watching videos.

[Launch the learn pane](#)

Samples

Experiment with examples that show off all that Cognos Analytics has to offer.
